AURA

# USERS GUIDELINE

SCENES
CREATION

A Scene is basically used to combine/ trigger various actions via just a single command.

—

Access the Main Control Panel from the Main Screen – Tap on the Scenes section of the Control Panel.

STEP 2

—

Tap the 'Create New Scene' section and proceed.

Scenes Settings

Create new scene

Delete scene

**Create Scene**

Scene Name   Good Morning ▾

+

—

Select the 'Scene Name' accordingly from a variety of options (In this example, the Scene Name has been selected as 'Good Morning').

STEP 4

—

Select the Area / Room where you'd prefer to trigger the necessary action.

Select Device

Ceiling Light Fan TV AC Chandelier

—

Select the Device you'd like to trigger as part of the Scene, from devices you've already added to the room.

—

In this scenario we've selected the 'Ceiling Light' to be part of the Scene here (Upon triggering 'Good Morning' – the 'Ceiling Light' is expected to turn on.
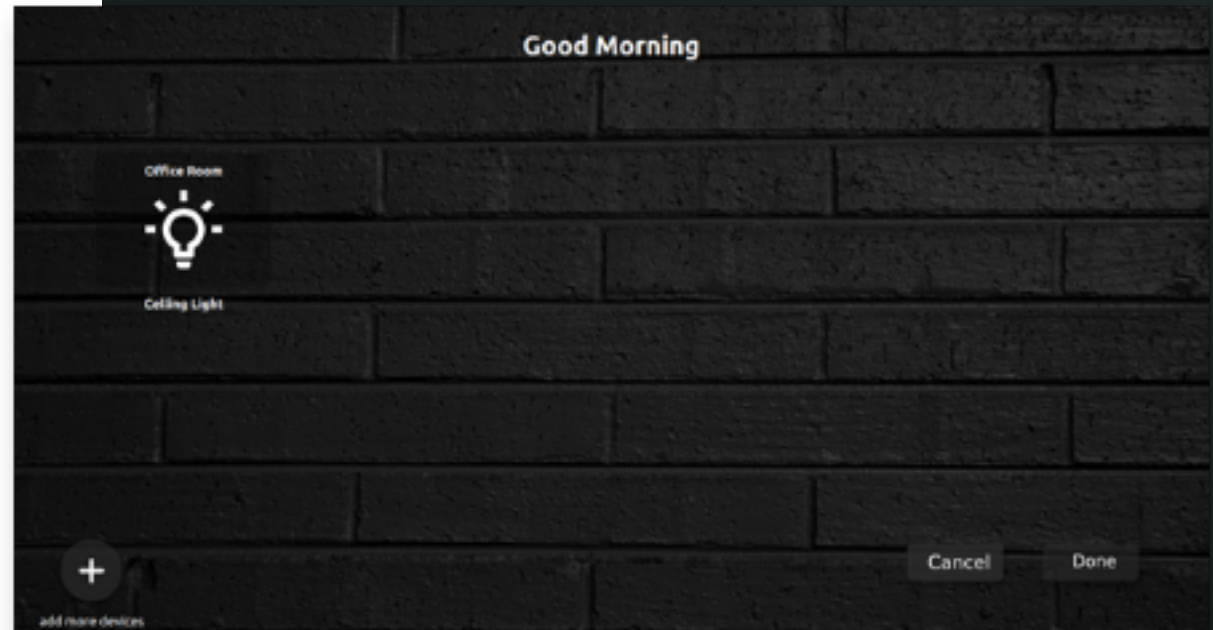

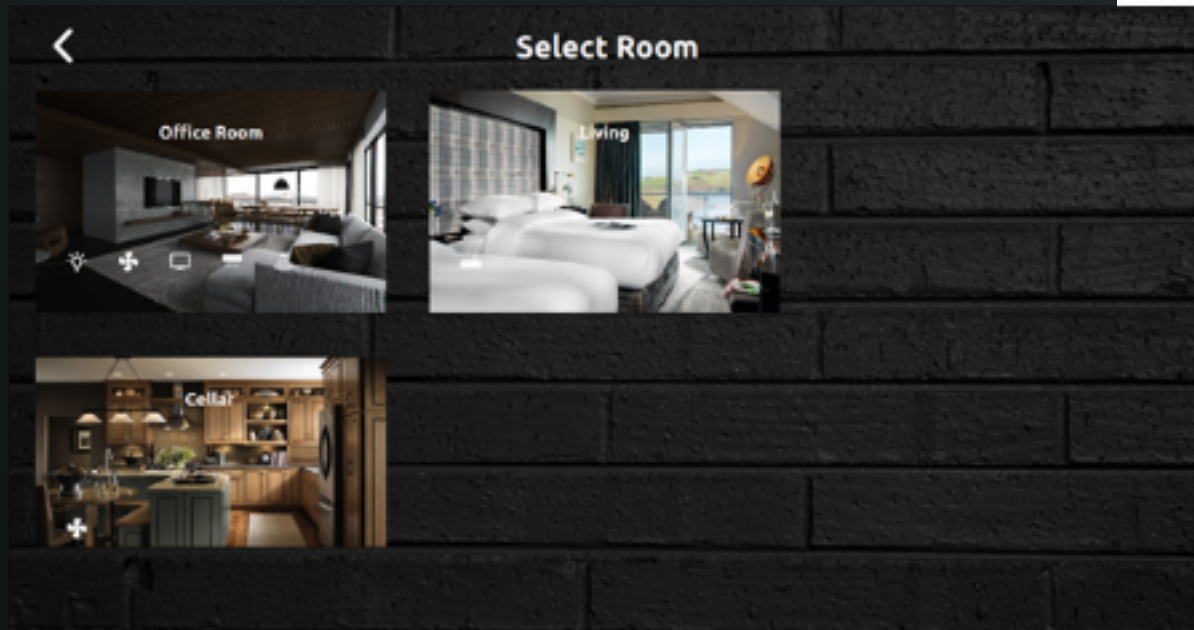

STEP 7

—

The Final State of the Device as part of the Scene can be set and saved accordingly.

STEP 8

—

Save the Device/Device State as part of the Scene and then proceed. On this Screen, you may either choose to finalize the Scene itself or proceed to Add more Devices to the Scene by tapping the 'Add More Devices' section at the Bottom Left Corner.

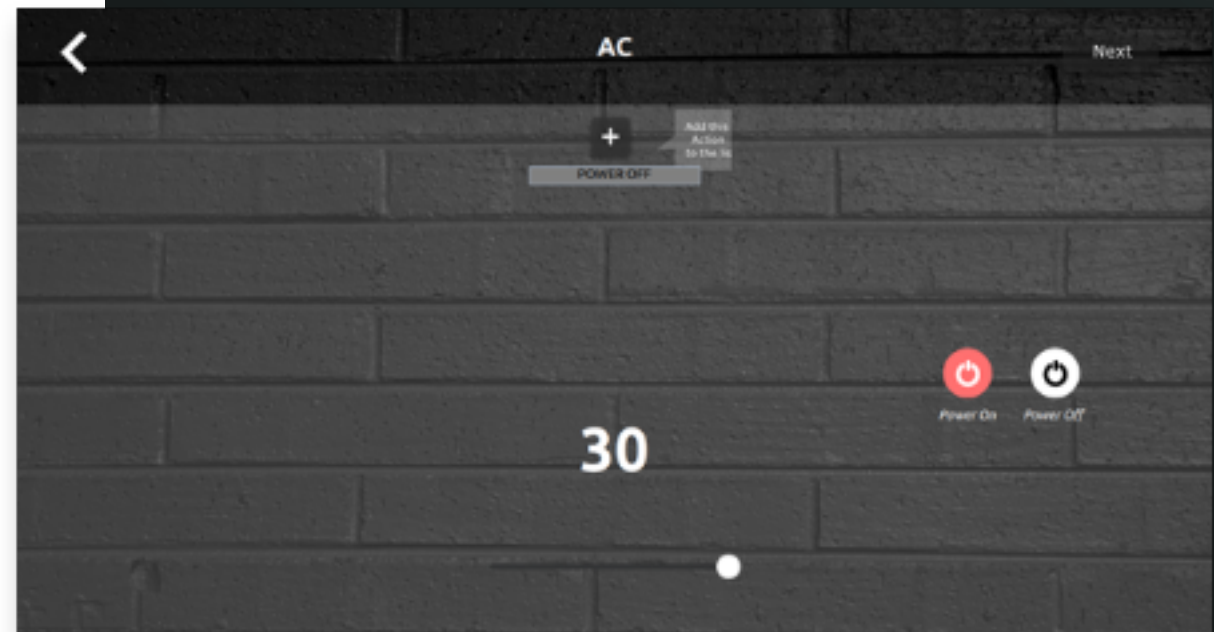

Good Morning

Office Room

Ceiling Light

add more devices

Cancel   Done

—

Upon tapping 'Add More Devices', you are given the Option to again select the room for your targeted action which will be triggered as part of the scene. You can either go setup more devices in the same room or select a new room as well.

—

We've decided to go
with the Air-Conditioning
Unit in this scenario. The
Actions to be carried are
to be input before
proceeding.

STEP 11

—

In this Scenario, we've opted to turn off the Air-conditioning Unit upon triggering the 'Good Morning' scene. You can save the Device/Device State when the desired action has been configured as needed.

—

Once the necessary
Devices and their
respective actions have
been saved as part of
the Scene itself, you can
either proceed to confirm
the Scene as a whole or
proceed to add further
devices as need be.
Upon completion, all you
have to do tap the
'Done' section on the
Screen and your Scene
is good to go.

Good Morning
